About Singularity University

SingularityU International Summits are hosted by SU partners across the globe to help local leaders understand how to apply exponential technologies to create positive change and economic growth in their regions.

SingularityU Summits are two-day conferences that become an annual point of connection and inspiration, a catalyst to accelerate a local culture of innovation, a platform for people to work on impact initiatives, and an opportunity to convene members of the community for discussion around rapidly changing technologies.

Singularity University (SU) is a global learning and innovation community using exponential technologies to tackle the world's biggest challenges and build an abundant future for all.

A certified benefit corporation, headquartered at NASA Research Park in Silicon Valley, SU was founded in 2008 by renowned innovators **Ray Kurzweil** and **Peter H. Diamandis** with program funding from leading organizations including Google and UNICEF.

"Our technology, our machines, is part of our humanity. We created them to extend ourselves, and that is what is unique about human beings."

Ray Kurzweil
Co-founder, Singularity University

SingularityU International Summits

SingularityU International Summits are hosted by SU partners across the globe to help local leaders understand how to apply exponential technologies to create positive change and economic growth in their regions.

SingularityU Summits are two-day conferences that become an annual point of connection and inspiration, a catalyst to accelerate a local culture of innovation, a platform for people to work on impact initiatives, and an opportunity to convene members of the community for discussion around rapidly changing technologies.

"Creating abundance is not about creating a life of luxury for everybody on this planet: it's about creating a life of possibility."

Peter Diamandis
Co-founder, Singularity University

SingularityU in Greece

Singularity Summit is coming for the first time in Greece on November 19th - 20th 2018 at Athens Concert Hall. A unique world class event on innovation, brings the Silicon Valley way of thinking, tailored made for Greece.

Discover how technology creates a “New Era” and how a “New Mindset” on digital transformation and innovation can create economic and business growth on a personal, corporate and societal level. Get exposed to the new Paradigm Shift on Leadership, Innovation, Technology and Creativity.

Why you should attend

In a continuously transforming world, business needs to adapt and evolve at an accelerating pace.

Every known industry is subject to disruption, in the coming years, and SingularityU Greece Summit is here to evolve our mindset.

With a world class lineup of experts, cutting-edge technologies and inspiring workshops that will change our mindset forever.

A two-day summit to leapfrog us to the future.

Through exponential trends and disruptive technologies that can lead us on a growth trajectory for self, business and our country.

By attending SingularityU Greece Summit **you will:**

- Expand our horizons with a world class lineup of speakers.
- Discover cutting edge technologies to survive disruption and grow our business.
- Experience inspiring workshops to evolve our mindset.
- Connect with like minded visionaries who seek ways for growth and positive change.

You attend because **you are:**

- **CEO responsible** for the long term survival and growth of business.
- **C-level Executive** responsible for business Strategy, competitiveness and profitability.
- **Marketing Executive** responsible for innovation, competitiveness and growth.
- **HR Executive** responsible for bringing new mindset and 21st century skills to your corporation.
- **Government official** responsible for Management and Policy Making.
- **Business Founder/Owner** exploring ways to scale and transform your business through technology.
- **Community Leader** responsible for an NGO or a Non Profit Organisation.
- **Researcher** seeking to link cutting edge technology with business.
